

Moves and changes

Financial Institution, Canary Wharf, London

Highlights

At Axis, we've helped banking institutions adapt quickly to market conditions, high-end brands create environments that wow their customers, and corporate landlords create more workstations within the same space.

Our service provides office changes from basic reorganisation through to the planning and execution of large-scale moves. Our strategic management approach ensures everything from space-planning, logistics and storage through to IT equipment testing and deep cleaning are in place before the first box is packed – this direct control ensures business continuity for our clients.

We work flexibly around times that suit your business –usually overnight and during the weekend. Your employees will leave work Friday evening and return to the new office space Monday morning; the only thing that may be different is the floor they work on.

What we do

- Small and large-scale moves
- Space planning
- Logistics
- Storage
- IT equipment
- Testing and deep cleaning

Such attention to detail is one of the many reasons why we've worked with one Canary Wharf based financial institution, for over 18 years as an in-house facilitator. In 2017, we moved over 8000 people with 326 moved in one weekend alone. The 60 week programme also included some construction works.
